

WHO WE ARE & WHAT WE DO

We are a 60-year-old greenhouse operation. What my parents began as a tree-lined nursery is now over 10 greenhouses of growing annuals, perennials, ornamental grasses, vegetables and tropical plants.

At Randolph's, we specialize in unique plant material for container gardens, hanging garden baskets, and perennial gardens.

We especially love searching for, and growing unusual, colorful plant collections. These plants are the focal point of our custom work. These have been described as 'Eye Candy'. Most of our plant combinations are interesting creations of texture and color, so attracting that some people want to reach out and touch.

That's ok with us - just look out for those Agaves! ...and the sedums are a little fragile too!

WHAT WE DO

Our main focus is growing exceptional plant material for containers and gardens.

In our retail garden center, our plants are displayed in separated greenhouses for 'Sun' & 'Shade'.

This wonderful sales aid lets customers get started looking for the right plant for their needs.

In addition to that, our benches are color coordinated in 'families'.

There are displays with color harmonies, polychromatic mixes, monochromatic blends and so on.
